Sumit Narwade

✗

✓ Q. 1. Which of the following keyword is used to explicitly raise an exception?

*1/1

- ☐ raise
- ☐ catch
- ☒ throw
- ☐ throws

✓

✓ Q. 2. An object is created _____ time in java. *

1/1

- ☐ Compile-time
- ☒ Run-time
- ☐ c. Assembling-time
- ☐ none of the above

✖ Q. 3. What is the ouput of the below program *

0/1

```
public class Test

{

    void Test()

    {

        System.out.println("Cdac");

    }

    Test()

    {

        System.out.println("Acts");

    }

    public static void main(String[] args)

    {

        Test ts = new Test();

    }

}
```

- ☐ a. Acts
- ☒ b. Cdac
- ☐ c. No output
- ☐ d. compile time error

✖

Correct answer

- ☒ a. Acts

✓ Q. 4. The interface comparable contains the method_____ *

1/1

- ☐ a. toCompare
- ☐ b. compare
- ☒ c. compareTo
- ☐ d. compareWith

✗ Q. 5. Which interface must be extended in order to use multithreading * 0/1

- ☐ a. Runnable
- ☒ b. Thread
- ☐ c. Threading
- ☐ d. none of the above

Correct answer

- ☒ a. Runnable

✓ Q. 6. The out object is predefined standard object of this class *

1/1

- ☒ a. PrintStream
- ☐ b. DisplayStream
- ☐ c. WriteStream
- ☐ d. FileOutputStream

✓ Q. 7. What is the output of the below java program *

1/1

```
public class Sweet {  
    void price()  
    {  
        System.out.println("Sweet=$10");  
    }  
}  
  
class Sugar extends Sweet  
{  
    void price()  
    {  
        super.price();  
        System.out.println("Sugar=$20");  
    }  
}  
  
public class Javainheritance()  
{  
    public static void main(String[] args)  
    {  
        Sugar su = new Sugar();  
        su.price();  
    }  
}
```

- ☒ a. Sweet=\$10 Sugar=\$20
- ☐ b. Sweet=\$10 Sugar=\$10
- ☐ c. Sweet=\$20 Sugar=\$20
- ☐ d. compile error

✗ Q. 8. Which of the following keyword is used to explicitly raise an exception?

*0/1

```
public class Test{  
  
    public static void main(String args[])  
  
    {  
  
        try  
  
        {  
  
            System.out.println("A");  
  
            throw new NullPointerException("Hello");  
  
        }  
  
        catch (ArithmeticException e)  
  
        {  
  
            System.out.println("B");  
  
        }  
  
    }  
  
}
```

- ☒ a. A
- ☐ b. B
- ☐ c. Hello
- ☐ d. A NullPointerException

✗

Correct answer

- ☒ d. A NullPointerException

✓ Q. 9. What will be output of following program *

1/1

```
Int a =10;  
  
If(a==9)  
{  
  
    System.out.println("OK");  
  
    System.out.println("Hello");  
  
}  
  
Else  
{  
  
    System.out.println("Bye");  
  
}
```

- ☐ a. OK Hello
- ☒ b. Bye
- ☐ c. Compile error
- ☐ d. none of the above

✗ Q. 10. Increment and decrement operator in java has associativity *

0/1

- ☐ a. left to right
- ☒ b. right to left
- ☐ c. right to right
- ☐ d. left to left

✗

Correct answer

- ☒ a. left to right

✗ Q. 11. Which of the following can not be used as variable name in java *

0/1

- ☐ a. identifier
- ☐ b. keyword
- ☒ c. identifier & keyword
- ☐ d. none of the mentioned

✗

Correct answer

- ☒ b. keyword

✓ Q. 12. Which component is used to compile, debug execute in java program?

*1/1

- ☒ a. JDK
- ☐ b. JVM
- ☐ c. JIT
- ☐ d. JRE

✗ Q. 13. What is output of the java code snippet *

0/1

```
int a=4, b=6, c=8;
```

```
boolean d = a>5 && b>5 & c++<10;
```

```
System.out.println(c);
```

- ☐ a. 8
- ☒ b. 9
- ☐ c. 10
- ☐ d. Compile time error

Correct answer

- ☒ a. 8

✓ Q. 14. Properties are implemented using ____ in java *

1/1

- ☒ a. Methods
- ☐ b. Variables
- ☐ c. Interface
- ☐ d. All the above

✗ Q. 15. The methods wait() and notify() are defined in *

0/1

- ☒ a. java.lang.Runnable
- ☐ b. java.lang.ThreadGroup
- ☐ c. java.lang.Thread
- ☐ d. java.lang.Object

Correct answer

- ☒ d. java.lang.Object

✓ Q. 16 What is output of the java program with arrays *

1/1

```
public class Test {  
  
    public static void main(String[] args) {  
  
        String computer[] = {"RAM","HDD","MOUSE"};  
  
        String parts[] = {computer[0],computer[2]};  
  
        System.out.println(parts[1]);  
  
    }  
  
}
```

- ☐ a. RAM
- ☐ b. HDD
- ☒ c. MOUSE
- ☐ d. Compile time error

✓ Q. 17. What is output of the java code

*

1/1

```
public class Test {  
  
    public static void main(String[] args) {  
  
        try  
  
        {  
  
            System.out.println("Calculate:"+" "+1/0);  
  
        }  
  
        catch(ArithmeticException e)  
  
        {  
  
            System.out.println("Exception: Division by Zero");  
  
        }  
  
    }  
  
}
```

- ☐ a. Calculate:
- ☐ b. Calculate: Exception Division by zero
- ☒ c. Exception: Division by Zero
- ☐ d. Exception Division by zeroCalculate:

✓ Q. 18. What is output of the java code snippet *

1/1

```
int a=23, b=34;
```

```
a=((a<(b) ? (b+a) : (b-a)));
```

```
System.out.println(a);
```

☐ a. 11

☒ b. 57

☐ c. 23

☐ d. 34

✗ Q. 19. Which implementation of Iterator can traverse back and forth? *

0/1

☒ a. Iterator

☐ b. ListIterator

☐ c. MapIterator

☐ d. SetIterator

Correct answer

☒ b. ListIterator

✗ Q. 20. What is output of the java program *

0/1

```
public class Test  
{  
    public static void main(String args [ ])  
    {  
        int localVariable;  
        System.out.println(localVariable);  
    }  
}
```

- ☐ a. 0
- ☒ b. Garbage value
- ☐ c. NullPointerException
- ☐ d. Compile time error
- ☐ 1

✗

Correct answer

- ☒ d. Compile time error

✓ Q. 21. Which block is executed, regardless of exception thrown? *

1/1

- ☐ a. throws
- ☒ b. finally
- ☐ c. catch
- ☐ d. throw

✗ Q. 22. What is output of the java code *

0/1

```
public class S22 {  
  
    public static void main(String[] args) {  
        String str = "Hello";  
        System.out.println(str.substring(1,4));  
    }  
  
}
```

- ☐ a. hel
- ☐ b. ell
- ☒ c. llo
- ☐ d. hell

Correct answer

- ☒ b. ell

✗ **Q. 23. Which is fast among AND (&) and Short Circuit AND (&&) operators in Java**

*0/1

- ☒ a. And operators
- ☐ b. Short Circuit AND
- ☐ c. Both work at the same time
- ☐ d. none of the above

✗

Correct answer

- ☒ b. Short Circuit AND

✕ Q. 24. What is output of the java code *

0/1

```
final class Bus {  
  
    void show()  
  
    {  
  
        System.out.println("Generic Bus");  
  
    }  
  
}  
  
class ElectricBus extends Bus  
  
{  
  
    void show()  
  
    {  
  
        System.out.println("Electric Bus");  
  
    }  
  
}  
  
public class TestInheritance()  
  
{  
  
    public static void main(String[] args)  
  
    {  
  
        ElecrticBus eb = new ElectricBus();  
  
        eb.show();  
  
    }  
  
}
```

☐ a. Generic Bus

b. Electric Bus

c. Generic Bus Electric Bus

d. Compile time error

Correct answer

d. Compile time error

✓ Q. 25. What is output of the java program with an interface *

1/1

```
public interface Bus {  
    void move();  
}  
  
class ElectricBus implements Bus  
{  
    public void move()  
    {  
        System.out.println("implemented move() method");  
    }  
}  
  
public class InterfaceTest1 {  
  
    public static void main(String[] args) {  
        new ElectricBus().move();  
    }  
}
```

- ☐ a. no output
- ☒ b. implemented move() method
- ☐ c. compile error
- ☐ d. none of the above

✗ **Q. 26. Which is the exception or error that is thrown if a non-existing command-line argument is referred to in a java program?** *0/1

- ☐ a. StackOverFlowError
- ☒ b. IndexOutOfBoundsException
- ☐ c. ArrayIndexOutOfBoundsException
- ☐ d. ArithmeticException

✗

Correct answer

- ☒ c. ArrayIndexOutOfBoundsException

✓ **Q. 27. Which class stores elements in ascending order? ***

1/1

- ☐ a. ArrayList
- ☐ b. HashSet
- ☒ c. TreeSet
- ☐ d. All the answers are true

✓

✓ **Q. 28. In java local variables are stored in ___ memory and instance variables are stored in ___ memory**

*1/1

- ☐ a. Stack Stack
- ☐ b. Heap Heap
- ☒ c. Stack Heap
- ☐ d. Heap Stack

✓

✓ Q. 29. What is output of the java code snippet *

1/1

```
public class Test {  
  
    public static void main(String[] args) {  
  
        int i = 0;  
  
        for(i=1;i<=6;i++)  
        {  
  
            if(i%3==0)  
  
                continue;  
  
            System.out.println(i+"," );  
  
        }  
  
    }  
  
}
```

- ☐ a. 1, 2
- ☒ b. 1, 2, 4, 5
- ☐ c. 3, 6
- ☐ d. compile time error

✗ Q. 30. What is output of the java program *

0/1

```
int ages[3] = {25,27,30};
```

```
System.out.println(ages[1]);
```

- ☐ a. 25
- ☒ b. 27
- ☐ c. 30
- ☐ d. compile time error

✗

Correct answer

- ☒ d. compile time error

✓ Q. 31. Which of the following character oriented class for receiving input *1/1 from keyboard?

- ☐ a. IOReader
- ☒ b. InputStreamReader
- ☐ c. DataInputStream
- ☐ d. none of the above

✓

✓ Q. 32. What is output of the java program with switch and Strings *

1/1

```
String phone = "APPLE";
```

```
    switch(phone)
```

```
{
```

```
    case "Apple" : System.out.println("Apple");break;
```

```
    case "APPLE" : System.out.println("APPLE");break;
```

```
    case "SAMSUNG" : System.out.println("SAMSUNG");
```

```
}
```

- ☐ a. Apple
- ☒ b. APPLE
- ☐ c. SAMSUNG
- ☐ d. Compile error

✗ Q. 33. The special method that is called automatically when an object of a class is created is *0/1

- ☐ a. Finalizers
- ☐ b. Constructors
- ☒ c. desrtuctors
- ☐ d. none of the above

Correct answer

- ☒ b. Constructors

✗ Q. 34. The method used to String to Integer primitive data types *

0/1

- ☒ a. parseInteger()
- ☐ b. stringof()
- ☐ c. valuesof()
- ☐ d. none of the above

✗

Correct answer

- ☒ d. none of the above

✗ Q. 35. Which of these classes is super class of all Exception Classes? *

0/1

- ☒ a. RunTimeExceptions
- ☐ b. String
- ☐ c. Throwable
- ☐ d. Cachable

✗

Correct answer

- ☒ c. Throwable

✗ Q. 36. What is output of the java program *

0/1

```
public class Cricket {  
  
    int runs;  
  
}  
  
public class Test {  
  
    public static void main(String[] args) {  
  
        Cricket c1 = new Cricket();  
  
        c1.runs =250;  
  
        Cricket c2;  
  
        c2=c1;  
  
        c2.runs =300;  
  
        System.out.println("Runs= "+c1.runs);  
  
    }  
  
}
```

- ☐ a. Runs = 0
- ☒ b. Runs = 250
- ☐ c. Runs = 300
- ☐ d. Compiler error

✗**Correct answer**

☒ c. Runs = 300

✓ Q. 37. What is output of the java program with an abstract class *

1/1

```
abstract class Coffee {  
    Coffee()  
  
    {  
        System.out.println("inside constructor of coffee");  
    }  
}  
  
public class ColdCoffee extends Coffee {  
    ColdCoffee()  
  
    {  
        System.out.println("inside constructor of coldcoffee");  
    }  
}  
  
public class AbstractClassTesting {  
  
    public static void main(String[] args) {  
        ColdCoffee cf = new ColdCoffee();  
    }  
  
}
```

- ☐ a. Compiler error
- ☒ b. inside constructor of coffee inside constructor of coldcoffee

c. inside constructor of coldcoffee

d. inside constructor of coffee

✓ Q. 38. What is output of the java program

*

1/1

```
public class MyThread implements Runnable{

    @Override

    public void run() {

        System.out.println(Thread.currentThread().getName());

    }

}

public class ThreadTest {

    public static void main(String[] args) {

        Thread thread = new Thread(new MyThread());

        thread.run();

        thread.run();

        thread.start();

    }

}
```

- ☒ a. main main Thread-0
- ☐ b. Thread-0 main Thread-1
- ☐ c. main Thread-0 Thread-1
- ☐ d. Thread-0 Thread-1 Thread-2

✗ **Q. 39. Which exception is thrown by the read() method of InputStream class** *0/1

- ☐ a. Exception
- ☐ b. IOException
- ☒ c. FileNotFoundException
- ☐ d. none of the above

✗

Correct answer

- ☒ b. IOException

✓ **Q. 40. Constructor can call another overloaded constructor using the ___ keyword in java.** *1/1

- ☐ a. super
- ☐ b. local
- ☐ c. con
- ☒ d. this

✓

✓ Q.41. What is output of the java program *

1/1

```
public class Test {  
  
    public static void main(String[] args) {  
  
        String s1 = new String("cdac");  
  
        String s2 = new String("acts");  
  
        System.out.println(s1=s2);  
  
    }  
  
}
```

- ☐ a. true
- ☐ b. false
- ☐ c. cdac
- ☒ d. acts

✓ Q. 42. What is output of the java program using toString() method *

1/1

```
public class College {  
  
    public String toString()  
  
    {return "College Object";}  
  
}  
  
public class Test {  
  
  
  
    public static void main(String[] args) {  
  
        S42College col = new S42College();  
  
        System.out.println("Printing Object="+col);  
  
    }  
  
}
```

- ☐ a. Printing Object =
- ☐ b. Printing Object = null;
- ☒ c. Printing Object = College Object
- ☐ d. Compile error

✓ Q. 43. Class is ____ *

1/1

- ☐ a. instance of an object
- ☐ b. Scope of an object
- ☐ c. Parent of an object
- ☒ d. blueprint of an object

✓ Q. 44. When overloading does not occur *

1/1

- ☐ a. More than one method with same name but different number or type of parameters
- ☐ b. More than one method with same name but different number parameter
- ☐ c. More than one method with same name, same number parameter but different type
- ☒ d. More than one method with same name, same number parameter and same type of parameter

✓ Q. 45. Which of the following is wrong statement *

1/1

- ☐ a. class extends class
- ☐ b. class implements interface
- ☐ c. interface extends interface
- ☒ d. interface implements interface

✗ Q. 46. Which of the following class is super class of every class in java? * 0/1

- ☐ a. String class
- ☐ b. Object class
- ☐ c. Abstract class
- ☒ d. Collection class

✗

Correct answer

- ☒ b. Object class

✓ Q. 47. What is downcasting? *

1/1

- ☐ a. casting subtype to supertype and vice versa
- ☐ b. casting any type to any other type
- ☒ c. casting supertype to subtype
- ☐ d. casting subtype to supertype

✓

✓ Q. 48. What is output of the java program *

1/1

```
public class Test {  
  
    public static void main(String[] args) {  
  
        double a = 295.04;  
  
        int b = 300;  
  
        byte c =(byte) a;  
  
        byte d =(byte) b;  
  
        System.out.println(c+" "+d);  
  
    }  
  
}
```

- ☐ a. 38 43
- ☒ b. 39 44
- ☐ c. 295 300
- ☐ d. 295.04 300

✗ Q. 49. Which of these is a wrapper for data type char *

0/1

- ☒ a. Char
- ☐ b. String
- ☐ c. Character
- ☐ d. All of the above

Correct answer

- ☒ c. Character

✓ Q. 50. Choose incorrect statement *

1/1

- ☐ a. Strings are immutable in java
- ☐ b. StringBuffer and StringBuilder are mutable. StringBuffer is synchronized, meaning its methods are thread-safe and can be safely used in a multithreaded environment.
- ☐ c. StringBuffer and StringBuilder are mutable. StringBuilder is not synchronized, which makes it faster than StringBuffer, but it is not thread-safe and should not be used in a multithreaded environment
- ☒ d. StringBuffer and StringBuilder are mutable. StringBuffer is synchronized, meaning its methods are not thread-safe and can be safely used in a multithreaded environment. On the other hand, StringBuilder is not synchronized, which makes it faster than StringBuffer, but it is thread-safe and should not be used in a multithreaded environment

✗ Q. 51. Which of these methods of class String is used to compare two String objects for their equality? *0/1

☒ a. Equals()

✗

☐ b. equals()

☐ c. isequal()

☐ d. lsequal()

Correct answer

☒ b. equals()

✓ Q. 52. What will be the output of the following java code

*1/1

```
public class Enum {  
  
    public static void main(String[] args) {  
  
        enum Season  
  
        {  
  
            WINTER , SPRING, SUMMER, FALL  
  
        };  
  
        System.out.println(Season.WINTER.ordinal()+Season.  
SPRING.ordinal());  
  
    }  
  
}
```

- ☐ a. 0 1
- ☒ b. 1
- ☐ c. 0
- ☐ d. none of the above

✗ Q. 53. The accuracy and efficiency of a HashMap can be guaranteed with * 0/1

- ☒ a. override equals method
- ☐ b. override hashCode method
- ☐ c. Both of the above
- ☐ d. none of the above

✗

Correct answer

- ☒ c. Both of the above

✗ Q.54 How to get UTC time? *

0/1

- ☒ a. Time.getUTC();
- ☐ b. Instant.now();
- ☐ c. Date.getUTC();
- ☐ d. TimeZone.getUTC();

✗

Correct answer

- ☒ b. Instant.now();

✗ **Q. 55. Which of these is an interface for control over serialization and deserialization?** *0/1

- ☒ a. Serializable
- ☐ b. Externalizable
- ☐ c. FileFilter
- ☐ d. ObjectInput

Correct answer

- ☒ b. Externalizable

✓ **Q. 56. Which of these is valid about threads in java? ***

1/1

- ☐ a. Threads consumes cpu in best possible manner
- ☐ b. Threads enables multiprocessing
- ☐ c. Threads can execute any part of process and same part of process can be executed by multiple threads
- ☒ d. All of the above

✗ Q. 57. The Synchronized keyword is applicable for *

0/1

- ☐ a. Variables and methods
- ☐ b. Methods and classes
- ☒ c. Variables and Classes
- ☐ d. Methods and Blocks

✗

Correct answer

- ☒ d. Methods and Blocks

✓ Q. 58. When does Exception in java arises in code sequence? *

1/1

- ☒ a. Run Time
- ☐ b. Can Occur Any Time
- ☐ c. Compile Time
- ☐ d. none of the above

✓

✓ Q. 59. Which of these classes relies upon its subclasses for its implementation of its methods

*1/1

- ☐ a. Object CClass
- ☒ b. Abstract CClass
- ☐ c. Final CClass
- ☐ d. Sealed Class

✓

✓ Q. 60. Which of the following is an incorrect statement about interface? * 1/1

- ☐ a. Interfaces specifies what class must do but not how it does
- ☐ b. Interfaces are specified public if they are to be accessed by any code in the program
- ☐ c. All variables in interface are implicitly final and static
- ☒ d. All variables are abstract and methods are static if interface is defined public ✓
